

ANNEXURE E – SKILLS & SECTION PROGRAM REQUIREMENTS & CTES SCORES

To successfully pass the applicable Star Test, an athlete must attain the minimum Combined Technical Element Score (CTES) prescribed below, in addition to meeting all other test requirements.

The Star Test is a structured technical assessment required for certain competition pathways and consists of two parts: Part A – the Short Program or Pattern/Rhythm Program, as applicable to the discipline and section; and Part B – the Free Program.

Each part of the Star Test is assessed on the basis of the Technical Element Score (TES) achieved in the respective program. The Combined Technical Element Score (CTES) is defined as the total of the TES from Part A and Part B, after the deduction of any applicable technical deductions, and is used for qualification and recognition purposes in accordance with the relevant SAFSA Rules and Annexures.

A Star Test shall be deemed successfully completed only when the athlete has:

- Passed the prescribed Skills Test(s) for the relevant level;
- Achieved the required minimum CTES; and
- In the case of Solo Dance and Couple Dance, successfully completed the required additional Dance Tests applicable to that level.

No Star Test shall be recorded as passed unless all the above requirements have been fully satisfied in accordance with these Regulations.

The following sections describe the program and test requirements as well as the Combined Technical Element Scores:

SKILLS TEST REQUIREMENTS**STAR PROGRAM REQUIREMENTS & CTES**

1. SKILLS TESTS REQUIREMENTS

Requirements – Skating Skills Tests

SKATING SKILLS LEVELS	TEST REQUIREMENTS
Level 1	As per the MOVES IN THE FIELD HANDBOOK on SAFSA Website
